

Logo'pop XS

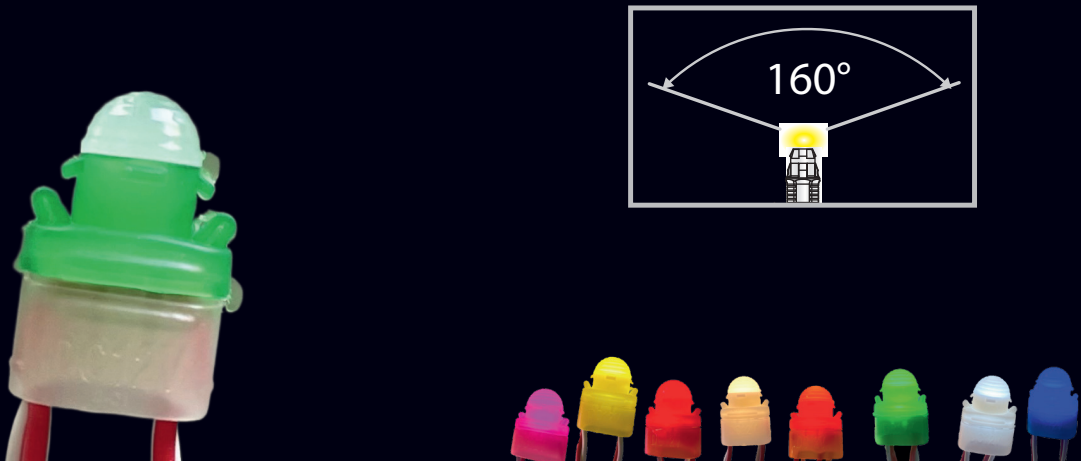

With the Domino Sign Logo'pop XS, you can create shapes of any size and faithfully reproduce lettering or logos.

The small size of the LEDs allows for a fine line of light that can be reinforced by doubling or tripling the LED lines.

When grouped together, the LEDs produce extremely bright patches of colour.

By varying the arrangement and combining the colours, all effects are possible.

- CREE
LEDs
- High brightness
 - Can be cut by the unit
 - 3 year warranty
 - Coloured LED casing
 - Low power consumption
 - 50 modules in series
