

Flex RGB New

Domino Sign Flex RGB, with 120° luminous flux, is used for the illumination of box letters and for backlighting very small letters.

Thanks to their flexibility, Domino Sign Flex follow the most complex shapes.

The Flex RGB version is Horizontal, which makes it possible to illuminate very small letters with a minimum thickness of 15 mm and a plexiglass face.

- 120 leds per meter
- lighting of small letters
- 120° angle
- IP 67: waterproof silicone sheath
