

Dmax Mono

The Domino Sign Dmax MONO is a new, highly accurate technology developed for the meticulous production of small signs, backlighting on narrow widths and very shallow boxes (minimum 25 mm) with a reduced footprint.

Its uniform luminous flux allows almost any lettering surface to be worked on while offering precision and ease of use.

- High power
- Small size
- 150° angle
- Available in 6,500 K white
- and ultra 10,000 K
