

Domino Sign Flex, with its 140° luminous flux, is used for the illumination of box letters and for the backlighting of very small letters.

Thanks to their flexibility, Domino Sign Flex can be adapted to the most complex shapes.

The Flex Horizontal version is used to illuminate very small Plexiglas letters with a minimum thickness of 15 mm.

The Flex Vertical version allows the backlighting of a letter with a minimum width of 15 mm.

- 84 LEDs per metre
- small letter illumination
- 140° angle
- IP 67: waterproof silicone sheath
- Horizontal or Vertical flex
- Available in 7 colours
