

ControlerWifi

WiFi controller is a multi-purpose lighting system. Thanks to the WiFi function, mobile devices can easily control different types of LEDs after installing the associated application.

WiFi controller offers 5 types of controls: dimming, white temperature settings, RGB and RGB-White. It also allows you to control up to 12 zones individually using WiFi repeaters.

- ☒ WiFi connection between each zone (50 m)
- ☒ Smartphone application
- ☒ Radio remote control
- ☒ Infinite programs
- ☒ 3 year warranty
- ☒ Google Play Store and App Store

Principle of operation :

Jusqu'à 12 zones

Technical information

Powerful WiFi controller:

192 W / 12 VDC*

384 W / 24 VDC

4 A x 4 CH (16 A)

*or about 240 DMax3 RGB modules

Repeater power :

240 W / 12 VDC**

480 W / 24 VDC

5 A x 4 CH (max 20 A)

**or about 320 DMax3 RGB modules (0.72 W / 12 VDC)

Mobile application 5 functions to choose :

Gradateur
Dimming

Contrôle de température de blancs
RGB+W

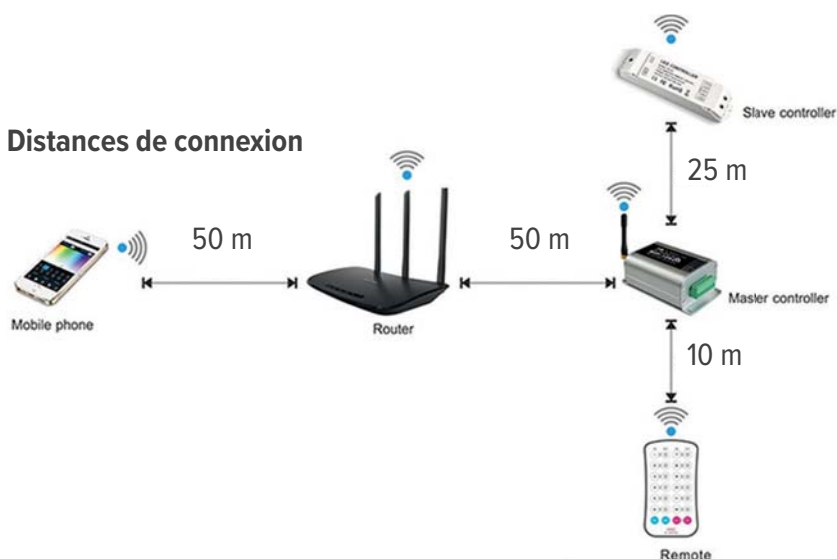

RGB

RGB et Blanc
RGB+W
