

Logo'pop XS

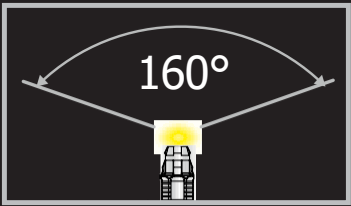

With the Domino Sign Logo'pop XS, you can create shapes of any size and reproduce lettering or logos faithfully.

The small size of the LEDs allows for a fine line of light that can be reinforced by doubling or tripling the LED lines.

When grouped together, the LEDs produce extremely bright colour spots.

By varying the layout and combining colours, all effects are possible.

- CREE
LEDs
- High brightness
 - Separable by the unit
 - 3-year warranty
 - LED colour box
 - Low consumption
 - 50 modules in series
